**Learn the best practices in setting up cell-based assays using automated microscopy, leading to the discovery of novel drugs**

This course is open to newcomers, seasoned research scientists familiar with the technology and those seeking unbiased approaches to HCS and its application, from small focused to large scale drug screens

※ Courses Content, Lectures & Discussion will be in English

**Application  
Deadline**

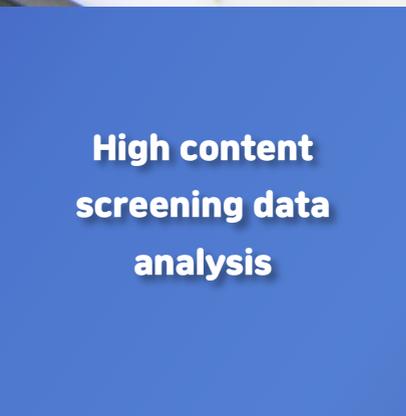

**Pasteur Network Applicants: May 31, 2024**  
**General Applicants: June 21, 2024**

**Design and establish cell-based assays for screening and complex phenotypic assays**

**High Content Assay: instrumentation and assay development**

**High content screening data analysis**

**Automated microscopy image processing and analysis**
